

Clean

AAI[®]

Suede Beams & Vault Boards

FYI: Following the CDC guidelines is recommended for cleaning, however continued use of disinfectant chemicals may reduce the life of the products.

Step 1.

Brush off the surface with a soft bristle brush to get rid of the chalk, dirt, etc.

Step 2.

Use warm water and a very small amount of liquid dish detergent or follow the directions if using Truce products.

Step 3.

Lightly brush/scrub the top of the Beam or Vault Table Top in a circular motion (do not over saturate) with the brush or wipe with cloth. **Repeat if necessary.**

Step 4.

Let air dry completely. Then brush off the surface again with a dry soft bristle brush.

Step 5.

Repeat as necessary until you get a desired effect. Ensure apparatus is completely dry before use.

.....

Note: If your beam is over three years old, consider having it recovered with an approved AAI Beam Recovery Kit. Contact your AAI Dealer for information and service. www.americanathletic.com/cleanbeam
